

Insurance Project Execution Commands

This document contains the terminal commands required to run the Insurance Platform projects using the shared backend architecture.

1. Shared Backend (API)

```
cd "shared_backend"
```

```
.\.venv\Scripts\python -m uvicorn main:app --host 0.0.0.0 --port 8000
```

2. Customer Portal Frontend

```
cd "customer"
```

```
npm run dev
```

3. Customer Support Frontend

```
cd "customer-support"
```

```
npm run dev
```

4. Insure Agent Frontend

```
cd "insure-agent"
```

```
npm run dev
```

5. Hospital Claim Form Frontend

```
cd "hospital claim form"
```

```
npm run dev
```

Insurance Project Execution Commands

Note: All frontends are configured to connect to the backend at <http://localhost:8000>. Each frontend will automatically start on a unique port (8080-8083) to avoid conflicts.
